## Technical Bulletin CERAMIC TILE CLEANER

### Description:

**Ceramic Tile Cleaner** is formulated to clean wall and floor tiles, ceramic sanitary wares, indoor & outdoor ceramic decors, gres porcelain, klinker, cotto and cement tiles. It is especially suitable to remove mortar, grout left over from new installations, cement, efflorescence, salinity, greasy stains and stubborn dirt. Ceramic Tile Cleaner can also remove superficial rust stains.

### Technical characteristics:

Appearance	Liquid
Colour	Yellow transparent
Odour	Charateristic
Specific gravity at 20°C	1,00 ± 0,02
Hydro solubility	Soluble at every ratio
pH	2,5 ± 0,2
Shelf life at 20° C	12 months in its original closed container
Biodegradability	100%

### Instruction for use:

Spread evenly on the floor. Wait 5 to 10 minutes and then rub with a brush, abrasive pad or use a scrubbing machine fitted with Scotch-brite® pads. Repeat if necessary. Rinse well with clean water while scrubbing off the cement; collect the residues with sponge, cloths or wet vac.

### Suggestion for use:

Please follow the recommended dilution:

- To remove superficial cement, white cement stains, gypsum drops etc. dilute 100 ml of product in 1 litre of water.
- To remove cement or mortar left over after laying dilute 150 ml of product in 1 litre of water. In case of stubborn residue, increase the quantity.
- To remove rust, grease etc. dilute 50 ml of product in 1 litre of water.
- To remove efflorescence, dilute 30 ml of product in 1 litre of water.
- **Do not use Ceramic Tile Cleaner on polished marble, limestone and on any stone sensitive to acid.**
- Read the instructions printed on the label before usage.

### Application surfaces:

Ceramic, gres porcelain, klinker, cotto tiles, granite.

**Coverage:** For average usage on ceramic floor: One quart of product will clean 215/320 sq.ft. depending upon the amount of dirt.
