Polishing Powders for Marble & Granite

Our Polishing Powders use the purest raw materials insuring a quality finish on all natural stone!

5 EXTRA PREMIUM MARBLE POLISHING POWDER in white or yellow is a pre-mixed powder that uses the highest quality premium powders to create a brilliant shine on marble and terrazzo floors that have been worn down to a dull surface. 5 EXTRA restores a beautiful, high-gloss shine to worn surfaces and is ideal for periodic maintenance of polished stone floors and etched areas. Can be used to touch up high traffic areas without the need to do the entire floor. When using the product, you will notice less splattering because of its consistent homogenous mixture.

Instruction for Use: Apply 3-5 oz. of this product to the stone surface to be treated. Apply a small amount of water to the powder creating a slurry consistency. DO NOT allow slurry to sit or dry on the surface being polished. Buff the polishing solution (slurry) into the surface using a slow speed (140-300 RPM) polishing machine equipped with a tampico brush, hog's hair pad or white nylon pad. Move the machine slowly and evenly, doing a 10-20 sq. ft. area at a time. Add more water or powder as necessary to maintain the slurry consistency. Check polishing process every 15-40 seconds to prevent burn marks and monitor progress.

G7 GRANITE POLISHING POWDER safely removes surface and embedded stains on stones and porous masonry without etching the surface. Produces a smooth paste suitable for trowel application on horizontal, vertical and overhead surfaces. It can be used as a general purpose cleaner and is safe for use on a variety of interior and exterior surfaces.

Instruction for Use: Apply one scoop of G7 (1-3 oz.) to the stone surface to be treated. Apply a small amount of water to the surface until solution reaches a skim milk consistency. Do not allow solution to sit or dry on surface. Using a slow speed polishing machine equipped with a tampico brush, felt wheel or nylon pad, buff the polishing solution into the surface. When polishing granite, it is important to generate heat and friction in order to generate heat and friction in order to achieve a high quality polish. DO NOT MAKE SLURRY TOO WATERY.

MARBLE POULTICE POWDER safely removes surface and embedded stains on stones and porous masonry without etching the surface. Produces a smooth paste suitable for trowel application on horizontal, vertical and overhead surfaces. It can be used as a general purpose cleaner and is safe for use on a variety of interior and exterior surfaces.

Instruction for Use: Marble Poulitice Powder - Measure one pound of this product into a container and slowly add water while mixing to a dry paste consistency. Gradually stir in enough water until poulitice mix reaches the desired troweling consistency. Use a plastic spatula to apply poulitice to the surface, approximately 1/4-3/8 of an inch in thickness. Cover with plastic, insuring that it is airtight by taping the edges of the plastic down to the surface. Leave on for 24 hours. Remove using a spatula. Thoroughly rinse surface with fresh water. Repeat process if necessary. Clean surface to neutralize with Multiclean.
